Siddharth P

B.E. AI/ML Student | AI Systems Engineer

+91 74835 57950 | siddharthprashoo@gmail.com | Portfolio | GitHub | LinkedIn

SUMMARY

B.E. AI/ML student building dependable AI-powered software across web products, enterprise AI applications, agentic workflows, local RAG, and edge devices. Interested in the engineering around models: tool contracts, async work, evidence, human approval, local execution, and clear user workflows.

EXPERIENCE

AI/ML Intern - Equvinoxis Pvt Ltd | Bengaluru | Jun 2025 - Jul 2025

- Contributed to research and prototyping for AI-assisted facial analysis of pilot stress across feature extraction, model experiments, and human-lab evaluation.
- Documented experiments and compared multimodal approaches to support clear review of findings and limitations.

SELECTED SYSTEMS

CREDA | Shipped candidate-verification product

Built a full-stack candidate-verification workflow with structured evaluation, repository analysis, and authenticity signals; implemented multi-model fallback, Redis/BullMQ background work, and Supabase-backed product flows. React, Node.js, Supabase, Redis, BullMQ.

LibreChat + Buzz | Subhanu Technologies internal application work in progress

Working across LibreChat and Buzz application workflows with focus on ACP/MCP integration paths, clear tool boundaries, and user-facing interactions that make agent state and actions understandable. Internal work; scope is intentionally described at a high level. LibreChat, Buzz, ACP, MCP, LLM workflows.

SmartHelm | Edge-AI rider-safety system

Integrated MediaPipe eye analysis, MAX30102 heart-rate/SpO2 sensing, Raspberry Pi alerts, a Kotlin Android companion app, and Firebase reporting; raw face video remains on-device. Python, MediaPipe, Raspberry Pi, Kotlin, Firebase.

PayGuard-AgentX | Governed agent prototype

Designed an offline-first retail workflow prototype with LangGraph routing, schema-bound MCP tools, critic loops, signed evidence dossiers, and a human approval queue. Python, LangGraph, MCP, SQLite, Chroma, Kuzu.

TrustLayer | Shipped privacy-policy analysis product

Built a browser and web workflow that translates dense privacy-policy text into a visible risk signal through an Express-backed, LLM-assisted analysis layer. Chrome extension, Express, LLM integration.

SKILLS

AI systems: Agent workflows, ACP, MCP, LangGraph, LLM integration, human approvals, audit evidence, local RAG, hybrid retrieval, evaluation workflows

Engineering: Python, FastAPI, TypeScript, React, Next.js, Node.js, Express, REST APIs, Redis, BullMQ, SQLite, PostgreSQL, Supabase, Firebase

Edge & delivery: MediaPipe, Raspberry Pi, Kotlin, Android, Docker, GitHub Actions, CI/CD, Git, Flutter

EDUCATION

B.E. Artificial Intelligence and Machine Learning - B.N.M. Institute of Technology, Bengaluru | 2023 - 2027 | CGPA: 8.61/10
