Siddharth P.

AI Systems Engineer | Agentic AI | Enterprise AI Infrastructure | AI Product Engineering

+91 74835 57950 | siddharthprashoo@gmail.com | Portfolio | GitHub | LinkedIn

SUMMARY

AI Systems Engineer focused on agentic applications and enterprise AI workflows, with product engineering across web, mobile, local-first, and edge systems. Builds around clear tool boundaries, human review, evidence, and practical delivery.

EXPERIENCE

FDE Intern - Subhanu | Current

- Internal work across LibreChat and Buzz, a voice-less agent workflow, media-generation workflows, and Algo-Ops experiments.
- Video generation and direct media checks succeeded; retrieval and playback integration remain in progress. Algo-Ops is dry-run; Buzz integration is experimental and paused.

AI/ML Intern - Equvinoxis Pvt Ltd | Jun 2025 - Jul 2025

- Researched non-invasive facial-analysis approaches for pilot stress and fatigue monitoring in a human-lab setting; translated research objectives into practical monitoring workflows.

SELECTED PROJECTS

CREDA | Shipped
Skill-verification product documented around project-based interviews, repository context, and shareable skill records. Technologies: Product workflow; public technical stack not asserted. [proof]

TrustLayer | Shipped
Client-side tool that gives sentence-level trust signals for pasted AI responses and shows the heuristic path behind each label. Technologies: React, Tailwind CSS, Vite. [proof]

AARNA | Team-built testnet
Blue-carbon MRV hackathon build modeling project submission, evidence review, and testnet credit issuance; individual tasks are not partitioned in available artifacts. Technologies: Algorand, AlgoPy, Puya, IPFS. [proof]

SmartHelm | Android app exists; release unverified
Rider-safety project with an Android app in source and an edge-processing architecture for drowsiness signals. Technologies: Kotlin, Android, MediaPipe, Raspberry Pi, Firebase. [proof]

PayGuard-AgentX | Prototype
Local-first agent workflow prototype with supervised routing, constrained tools, evidence records, and a human review boundary. Technologies: Python, LangGraph, MCP, SQLite, Chroma. [proof]

CURRENT BUILDS AND CAPSTONE

OriginX-T | Active capstone
Dataset-forensics research with implemented contamination experiments and calibrated risk classification; advanced analyses remain gated. Technologies: Python, PyTorch, PEFT, scikit-learn. [proof]

NirmiqCodeSensei | Active local-first build
Repository learning and code-grounded practice with architecture mapping and MCP connections. Technologies: TypeScript, Next.js, SQLite, MCP. [proof]

NirmiqResearchOS | Active local RAG MVP
Offline-first academic workspace with retrieval, citations, Paper Lab, and Exam Lab. Technologies: Python, FastAPI, Next.js, SQLite, Chroma. [proof]

TECHNICAL SKILLS

Agent systems: MCP, LangGraph, tool workflows, human review, audit evidence | **AI & retrieval:** local LLMs, Ollama, RAG, BM25, Chroma, citations, abstention

Backend & data: Python, FastAPI, TypeScript, React, Next.js, Node.js, SQLite, PostgreSQL, Firebase | **Product & delivery:** Flutter, Kotlin, Android, Docker, Git, GitHub Actions, CI

EDUCATION

B.E. Artificial Intelligence & Machine Learning - B.N.M. Institute of Technology, Bengaluru | 2023-2027 | CGPA 8.61/10
