

SIDDHARTH P

CONTACT

- +91 7483557950
- siddharthprashoo@gmail.com
- Bengaluru, India

SKILLS

- Problem Solving
- Critical Thinking
- Analytical Reasoning
- Logical Decision Making
- Team Collaboration
- Project Management Adaptability & Learning Ability Project Collaboration
- Research & Implementation

LANGUAGES

- English
- Hindi
- Kannada
- Telugu

PROGRAMMING SKILLS

- Python & Java
- C programming language
- HTML,CSS , Java Script, PHP
- Scikit-learn & RapidMiner
- Tensorflow and PyTorch
- MySQL
- Arduino IDE, Tinkercad, Blynk
- API Integration
- Firebase integration
- Git version control
- No-code platforms
- Blockchain

PROFILE

Motivated AI/ML engineering student with a strong passion for developing innovative technical solutions. Proficient in Python, IoT systems, and full-stack development. Demonstrated ability to build scalable projects ranging from stress detection AI to decentralized blockchain platforms. Seeking an internship to leverage technical skills in real-world engineering challenges

WORK EXPERIENCE

AI/ML Intern - Equinox Pvt Ltd JUNE 2025 - JULY 2025

- Researched on stress faced by pilots during long flight durations and the consequences.
- Worked in the human lab sector on stress detection in pilots using facial analysis

PROJECTS

- 1)CREDA - AI-Powered Candidate Verification Platform | [www.trycreda.app](#)**
 - Full-stack SaaS (React 19 + Node.js + Supabase) with tiered multi-LLM fallback: Gemini Flash-Lite → GPT-4o-mini → Claude 3.5; deployed on Vercel + Render with BullMQ/Redis job queue and Opossum circuit breaker.
 - Engineered prompt chains for STAR method evaluation, authenticity scoring, and AI-generated response detection; SpendGuard module enforces daily AI spend caps per LLM provider.
 - GitHub repo analyser generates project-specific interview questions from file trees and commit history; anti-cheat layer: paste detection, typing-speed analysis, and prompt injection defence.
- 2)Stress Detection System - Multimodal Facial & Physiological Analysis**
 - Real-time, webcam-based system combining MediaPipe 68-point facial landmarks with rPPG/POS heart-rate estimation and a Random Forest classifier for accurate, hardware-free physiological stress inference.
 - Co-authored IEEE-format review paper at BNMIT; achieved multi-signal fusion across facial expression, action-unit detection, and estimated HRV features.
- 3)NirmiqResearchOS - On-Premise AI Research Infrastructure**
 - Local-first AI OS on RTX 4050 (6 GB VRAM) using Ollama for private LLM hosting, n8n for visual workflow automation, Docker for service orchestration, and Tailscale for zero-trust remote access.
 - Zero-cost AI pipelines for RAG chatbots, multi-agent research workflows, and content generation; serves as the inference backend for the AGION Wellness Platform case study.
- 4)AGION Wellness Platform - Edge-Deployed AI Health Assistant**
 - AI-powered wellness platform with LLM-driven personalised health insights and RAG-based knowledge retrieval; Flutter mobile frontend connected to the NirmiqResearchOS on-premise inference backend; designed for B2B deployment.
- 5)Project Aarna (ongoing) | [project-aarna-web.vercel.app](#)**
 - Developing a blue carbon MRV system using blockchain smart contracts and IoT sensors for verified environmental impact tracking and carbon credit issuance.
- 6)Trust Layer - Privacy Risk Analyser | [Chrome Web Store](#)**
 - AI-powered Chrome extension and web app with an Express API backend; uses LLM calls to analyse website privacy policies in real time, scoring user privacy risk on a 1-10 scale.

EDUCATION

- BNM Institute of Technology** 2023 - 2027 (present)
Bachelor of Engineering in Artificial intelligence & Machine Learning
- Sri ChaithanyaPU College (Pre-University) 2023** 2021 - 2023
PCMC
- Sri Vani Education Centre | 2021**
ICSE
